# *Sankalp ek Prayas*

SANKALP EK PRAYAS, is one of the most impactful non profits in India working in education sector.

SANKALP is an education promoting NGO registered under Chhattisgarh Society Registration Adhiyinam. Established in January 2008 (Registered in 2011), SANKALP is serving the under-privileged section of society.

SANKALP primarily concentrate on providing free educational facilities to the unprivileged children so that they gain the power of knowledge and strength of education with the passage of time.

# Overview

SANKALP has successfully been established as a truly service oriented group of professionals who want to bring lasting change in the lives of thousands of less fortunate children.

SANKALP works with the philosophy that the only way to ensure a better future for children is by educating them

.SANKALP believes that helping others is not simply a matter of dispersing money but of making a deep, long-term commitment and casting a hard eye on results.

With this model, SANKALP finds innovative solutions to this social issue.

## REASON FOR EXISTENCE

- The difference in quality between public and fee-paying schools continues to diverge, despite attempts by governments to improve the quality of schooling for our poorest children.
- In an effort to provide quality education to all, SANKALP EK PRAYAS currently works with volunteers who are working towards eradicating the high level of inequality present in Indian education system.
- SANKALP has slowly grown into an impact introducing NGO with its 60 centers working hard to place thousands of underprivileged children on the improved version of academic platform.
- SANKALP hopes to continue playing an important role and will continue to evolve in keeping with the needs of the hour for the better lives of the less fortunate children.

# Philosophy

SANKALP's aim is to catalyses socio-economic change primarily through the education of the underprivileged children.

SANKALP supports children's education projects.

SANKALP's interventions include support for infrastructure, providing learning aids and promoting socially meaningful curriculum development and child-centric joyful learning techniques.

# Approach

- SANKALP's projects are diverse in their location, target population, and approach to education.
- SANKALP has no political or religious affiliations and do not discriminate children on any basis, be it gender, religion, background, caste or race.
- SANKALP, in addition to providing education to the underprivileged children, also addresses other topics affecting human life such as health care, environment, socio-economic aspects, etc.

# Strategic Intent

## CORE VISION

Helping deprived children realizing their full potential through education.

## CORE MISSION

Reaching to maximum number of deprived children through SANKALP centers and bringing about sustainable changes in their lives through education.

# CORE VALUES

- **SPIRIT OF VOLUNTEERISM:**

A SANKALP volunteer participates in the spirit of pure volunteerism. Our volunteer's lives are enriched by being of service to others.

- **NON-DISCRIMINATORY**

SANKALP does not discriminate in its selection of philanthropic project activity, on the basis of gender, race, colour, religion, age, disability, gender orientation, lifestyle etc.

- **SECULAR, NON-POLITICAL AND NON-RELIGIOUS**

We support only secular community initiatives, projects or people. This means that we will not support initiatives or projects that are solely for the benefit of one religious community barring others. We support only non-political community initiative, projects or people. This means that we will not support a particular political party or ideology.

- **NO PERSONAL BENEFIT**

We keep an ethical firewall in our operations. Every project which SANKALP supports is not and should not be dependent on any personal benefit for that or any SANKALP volunteer.

# Belief

SANKALP believes that the future of any individual, people, country or indeed the world lies in education.

Despite the universalization of primary education being adopted as a key thrust area, the vast majority of children remain uneducated.

The government and several NGOs are working towards this aim. Several schools have been set up towards this end. However, there is a high percentage of poor education in the lower socio-economic strata in the nation.

This can be attributed to several factors including poor quality of teaching and lack of support at home due to the children being first generation learners.

# OUR ULTIMATE PURPOSE

*“If there is any truer measure of a man than by what he does, it must be by what he gives.” -*

*Robert South*

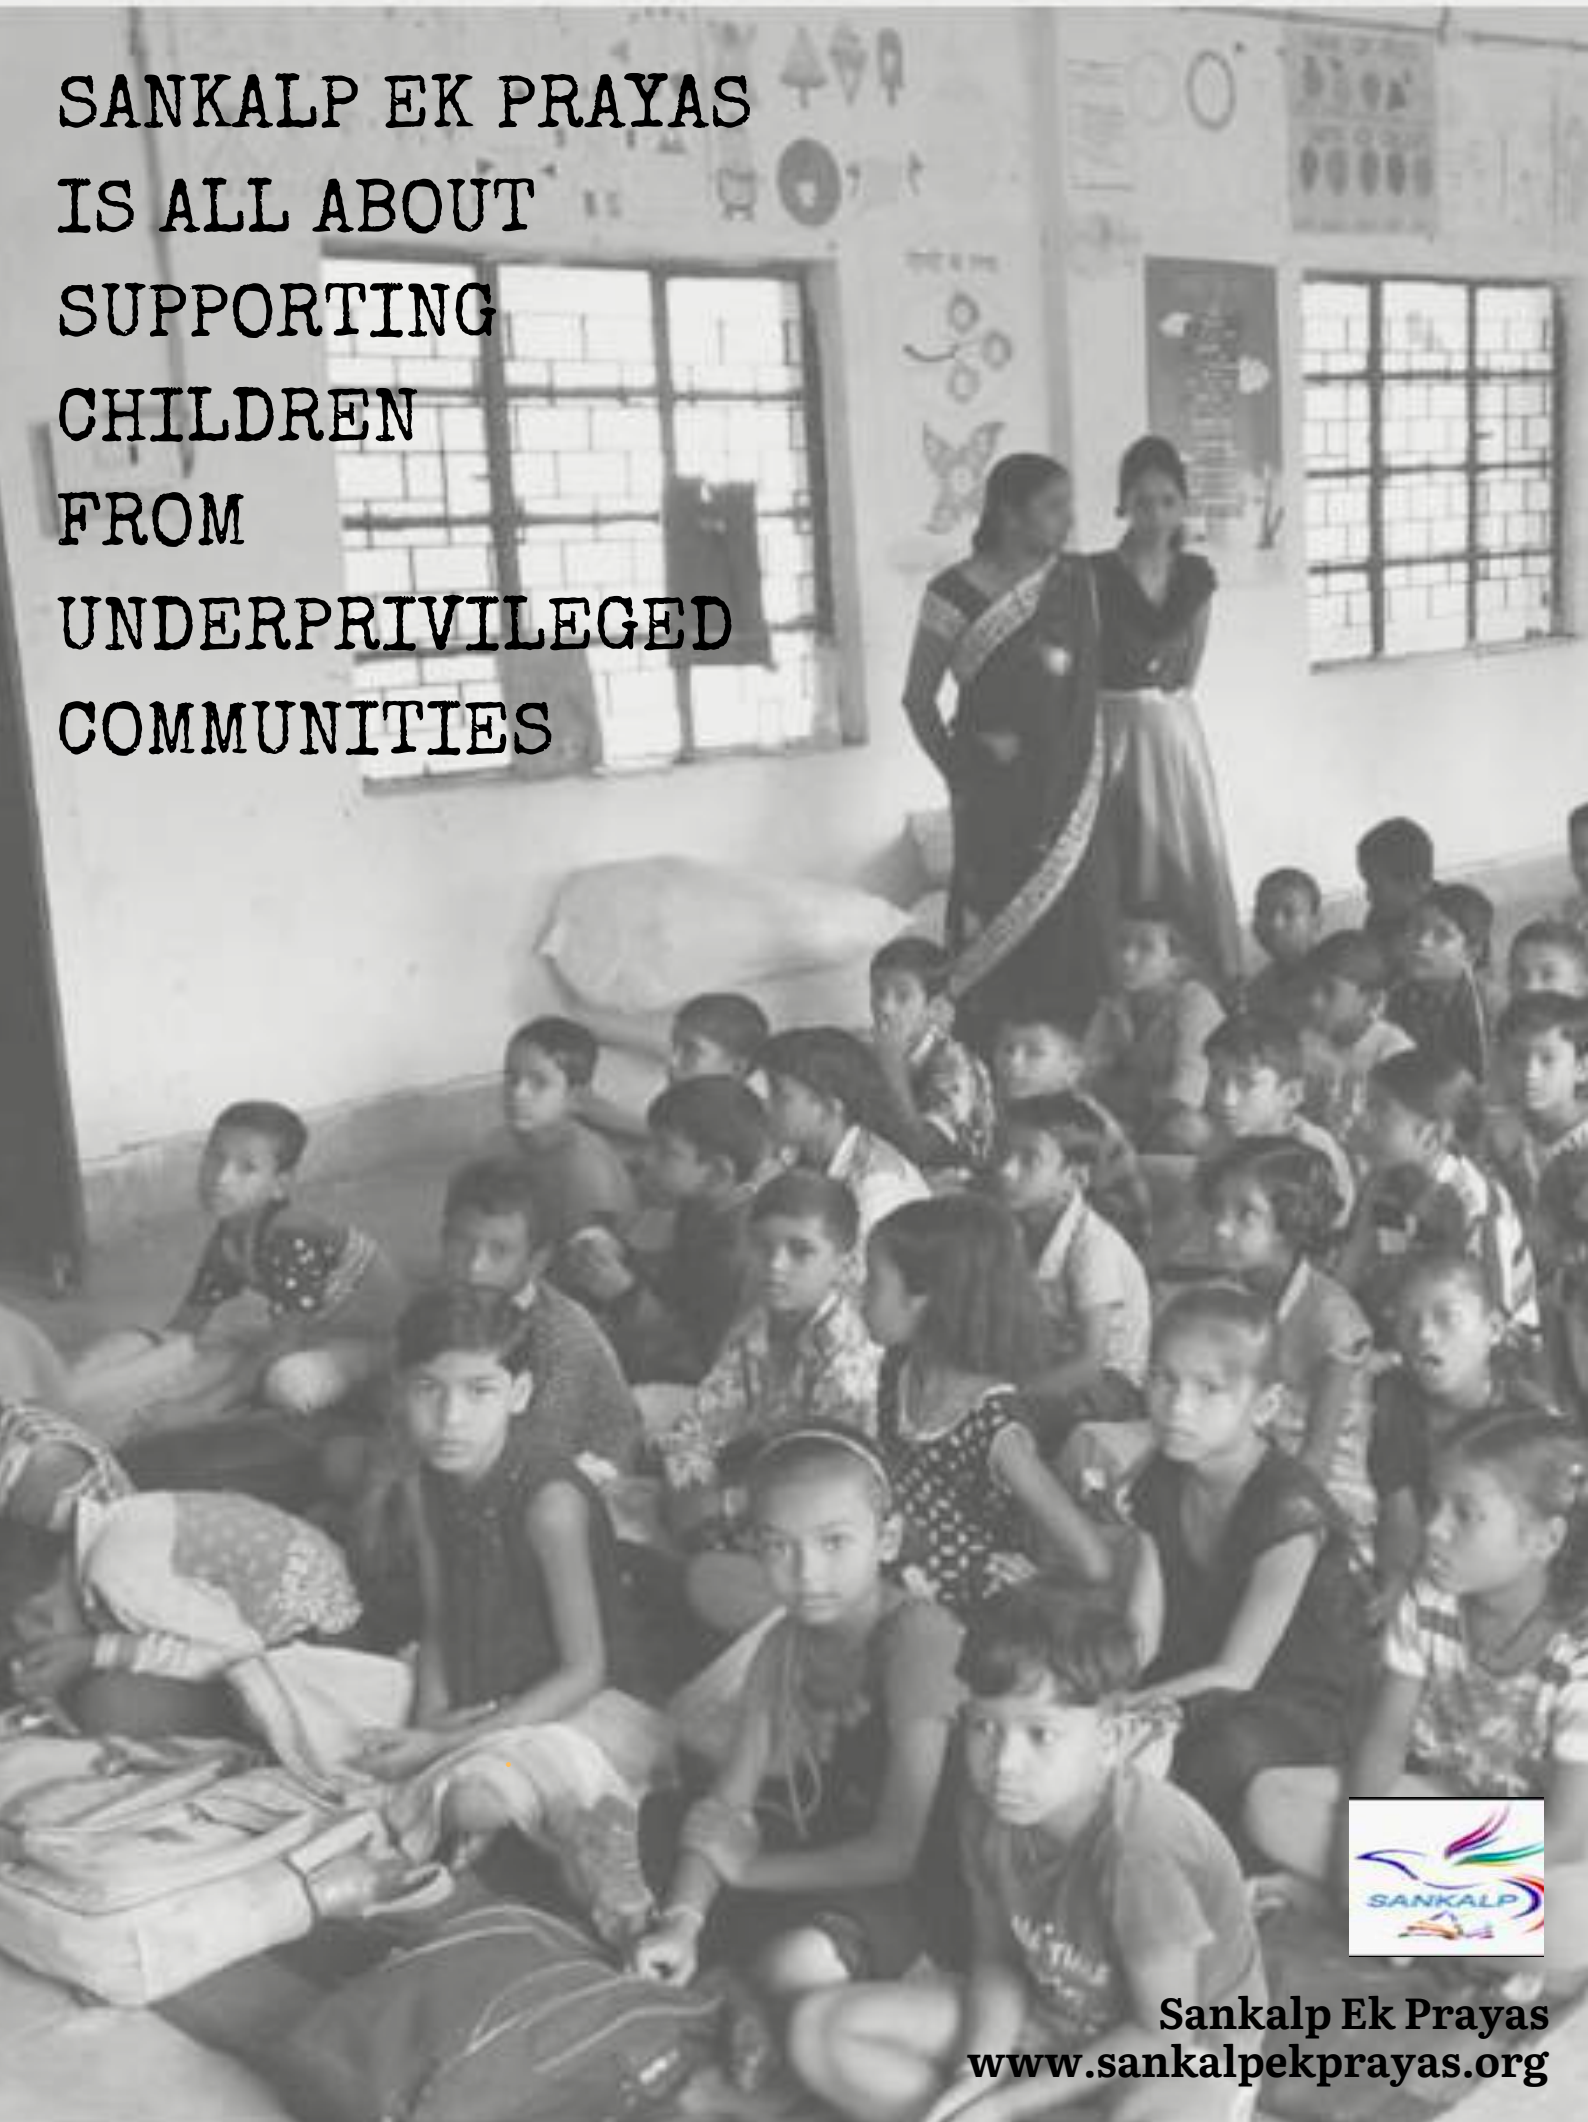

Every child can grow out of the unfortunate backgrounds, given the right resources.

Education, becomes an important part of a child's life and growth, making them efficient and capable of leading a better life and giving back to their country.

Without the route to education, a child cannot develop the necessary skills to sustain and grow into a responsible human being.

# Road Ahead

- Over the years, SANKALP has succeeded in touching the lives of thousands of children across the different projects that it has supported.
- However, we also realize that there is still a lot to be achieved since there are millions of children in India who do not have access to basic education.
- In the future, SANKALP hopes to continue playing an important role and will continue to evolve in keeping with the needs of the hour for the better lives of the less fortunate children.
- We are committed to devise the ways and means with which we can make a greater impact on the situation. In the end, we hope to be able to better understand the impact we have had, and where we should focus our efforts.
